## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or teach a yarn winding device having a plurality of C shaped magnetic circuits, pairs of posts spaced corresponding to twice the distance between north and south poles on a magnet combined with posts to the magnets offset relative to another phase corresponding to the magnetic step divided by the number of phases and in combination with magnets having north/south poles spaced apart by a distance corresponding to at least the half-distance lying between two consecutive posts in combination with the other features of claim 1.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. German reference DE 196 23 771 A1 (cited by Applicant) discloses a yarn winding device with a linear motor. German reference DE 44 28 321 A1 (cited by Applicant) teaches C-shaped magnetic circuits. Grehant 6,750,570 B1 discloses posts of one phase offset relative to posts of another phase corresponding to the magnetic step divided by the number of phases. Shtrikman 5,456,318 A discloses north and south poles spaced apart by a distance corresponding to at least half the distance lying between two consecutive posts. Parts of the instant invention are present in the prior art. What the prior art does not teach is combining those elements together in a single device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
